location: Essex / London, United Kingdom

phone: 07545 876201

profile

PHP Developer and Web Consultant with 8 years experience in OO PHP 5, MySQL 5, XHTML/HTML5, CSS2/3, API integration, jQuery JavaScript library and development team management / mentoring.

I am a passionate advocate for well-written, reusable code across all aspects of development. I use abstracted PHP and MySQL, coupled with W3C Strict XHTML and cross-browser compatible CSS to create rich web applications.

I am well versed with using the jQuery JavaScript library to enhance the users experience visually, functionally and unobtrusively whilst allowing for graceful degradation.

I have a keen interest in web standards, current trends and accessibility. I am passionate in what I do and strive to ensure that everything I do is better than the last.

BTEC national diploma (IT)

Overall Grade: Merit (~ three B's at A Level)

Distinction Units: Computational Methods, Software Programming, Visual Programming, Web Programming.
